Portland, OR 97219  
(503) 244-5782  
Tlx 757710

Dear Central Point Software Customer,

Thank you for your purchase. Like you, we recognize the importance of making backups of software so you will find that this product is not "copy protected" in any way.

In case you are not yet familiar with the copyright law as it relates to making copies of computer software, we'd like to take this opportunity to discuss it with you.

Many manufacturers of computer software copy-protect their products to physically prevent people from making copies and giving them away or reselling them. **Under the copyright law, you have a right to make copies to use in the event your original disk no longer functions. It is important to note that this is the only right to copy afforded to you under the law,** and both we and other software publishers request that you do not make copies for any other purpose.

Some states have enacted or are considering enacting "Shrink Wrap" license enforcement acts which may or may not affect your right to make backups of certain software products. We suggest that you check your state law to see whether it applies to you in this regard.

As part of an industry-wide effort to inform people of their rights under the U.S. copyright law, we have enclosed a copy of ADAPSO's "Thou Shalt Not Dupe" flyer. We hope you will take a moment to read it before using our product.

THANK YOU again for your purchase! We know you will find using your computer much more pleasant knowing you have safely put away backups of your valuable software. Please remember to fill out and return the enclosed product registration card. It entitles you to product support and allows us to keep you informed of major product improvements and updates as they occur!

Sincerely,

Michael D. Brown  
President

The following products have been submitted as "back-up-able" by our users. **Some require special instructions. These will be noted with a number in ( ). See the bottom of this sheet for the note with the same number.** Central Point Software, Inc. assumes no responsibility for the accuracy of this list. Remember, Copy II PC is only to be used to create archival backups.

Zork I, II, III

**(Note:** Protection schemes change frequently. If you have a brand new version of a program you can't backup, please let us know so we can report it to our programmers. Thank you!)

#### Special instructions for products noted above with corresponding numbers:

- 1) To backup this diskette, see "TO INSTALL NOKEY AND RUN A NOKEY FLOPPY BACKUP" under "MAKING FLOPPY BACKUPS."
- 2) These diskettes are "flippy" diskettes. To back them up, backup the front side onto one blank diskette using the /1 parameter and backup the reverse side onto another blank diskette, also using /1.
- 3) You'll need to backup these diskettes AFTER performing the install procedure on the original.
- 4) Can be run from the hard disk without inserting the original floppy. See "RUNNING PROTECTED PROGRAMS FROM A HARD DISK WITH NOKEY."
- 5) Requires the /1 parameter.
- 6) May require running "NOGUARD" (on Copy II PC disk) before running the backup. (See your Copy II PC manual.)

## What It Means to You

It's obvious that legitimate software users are paying for theft along with software developers.

It's obvious, too, that no one is going to put up with it for long.

Think twice before you ask someone to give you an illegal copy of their software. Think three times before you offer to do it for someone else. *Softlifting* or *software piracy* is not only a crime; it's simply wrong.

## Where to Get More Information

ADAPSO represents more than 750 corporate members that provide a wide spectrum of computer services and software including: micro, mini and mainframe software products; professional software services; batch and remote processing services; integrated hardware/software systems; education and training; and consulting.

For further information or questions on software protection, contact ADAPSO at Suite 300, 1300 North 17th Street, Arlington, VA 22209; or phone (703) 522-5055.

We encourage you to reproduce and distribute copies of this brochure.

**Thou Shalt Not Dupe**

## Either Way It's Wrong

People who would never walk into a store and shoplift a software product think nothing of making several copies of the same software. The results are the same. The act is just as wrong.

When it comes to unauthorized duplication of software, many people do not realize the costly impact on the software developer and the customer community. The relationship between customer and developer in a software transaction is one of mutual trust. The customer trusts that the developer has produced a product that will deliver the desired result, performs according to specifications, and is properly documented and supported. **The developer trusts that the customer will make use of only those copies for which he has purchased a license, even though making additional, unauthorized copies is relatively easy.** Unauthorized duplication and use of software violates the U.S. Copyright Law, and unfairly deprives software developers of revenue they are entitled to receive for their work.

Software developers find that thousands of illegal copies have been made by customers who either innocently believe they are doing nothing wrong or simply choose to ignore the law.

## The Law is Clear

Reproducing computer software without authorization violates the U.S. Copyright Law. It is a Federal offense. The money paid for a software product represents a license fee for the use of one copy. It does not represent an authorization to copy. Civil damages for unauthorized software copying can be as much as \$50,000 or more and criminal penalties include fines and imprisonment. Bills have been introduced in Congress to strengthen the law and increase penalties.

## Myths and Facts of Software

Let's start by dispelling some myths with a few facts.

First, software developers *do not* condone unauthorized copying in order to gain market penetration.

Second, the price of software *does not* make unauthorized copying justifiable. The cost of a software product to a consumer represents only a small fraction of the publisher's development and marketing costs.

Third, although the cost of *softlifting* is borne initially by the software developer, it is paid for ultimately by legitimate users.

## Now Available! COPY II PC OPTION BOARD

You have just purchased COPY II PC, a member of the world's most popular family of disk backup products. COPY II PC is the only disk utility that combines both a powerful floppy backup program and the ability to run the most popular business software from your hard disk without inserting the original diskette.

COPY II PC will probably meet all your disk backup needs. But to do our best to make sure you aren't left without a backup, we have created the COPY II PC OPTION BOARD, a hardware product that allows your computer to duplicate an even wider range of protected software.

### BUSINESS REPLY CARD

FIRST CLASS      PERMIT NO. A-174      PORTLAND, OR

POSTAGE WILL BE PAID BY ADDRESSEE

**Central Point Software, Inc.**  
9700 S.W. Capitol Hwy., Suite 100  
Portland, OR 97219-9990

The OPTION BOARD completely bypasses the standard disk circuitry of the PC, replacing it with the same type of disk duplication technology used by many software duplication firms (who put the copy protection on software in the first place). There is virtually no protection scheme the option board cannot handle (the only limitation being software protected by physically altering the diskette).

Examples of software it can backup include Clipper (Winter 1984 release), Quick Code /// 1.1, King's Quest II, DBASE /// 1.1, Framework 1.1, Ancient Art of War, Financial Cookbook, Get Organized 1.0, Spreadsheet Auditor 2.0, Electric Desk 1.04, One Write Plus, Bakup 3.0.2, Multimate 3.30, One-on-One, Professional Tax Planner 4.0, Pinball Construction Set, Disk Mechanic 4.02, Archon, Music Construction Set, Xeno-Disk System 1.21, Seven Cities of Gold, Bruce Lee, Spotlight, Word Perfect 4.0, Sign Master 5.05, Chart Master 6.05, Data Base Manager II 2.0, PC Paint, Maxthink 2.1, PolyWindows 1.0, DoubleDOS 2.1R, SPSS PC 1.1, and (of course), 123, Symphony, Harvard Total Project Manager, etc.

If you want to increase the backup capabilities of your computer, then the OPTION BOARD is definitely a product to consider.

The OPTION BOARD requires an IBM PC, IBM PC/XT, IBM PC/AT, COMPAQ Portable\*, or COMPAQ Deskpro computer with one available slot. The OPTION BOARD will not interfere with any other hardware or software you use and is not needed to run the backups it makes, only to create them.

The OPTION BOARD is priced at \$95 plus \$3 s/h (\$12 outside the US). (Compaq Portable owners please add \$10 for a required disk cable.)

### To Order By Mail:

- 1) Staple your completed Copy II PC registration card above, where marked.
- 2) Staple your check to this card OR  
note your   # \_\_\_\_\_, exp. \_\_\_\_\_
- 3) Your daytime phone # (\_\_\_\_\_) \_\_\_\_\_. Your computer? \_\_\_\_\_.
- 4) Fold this side in, tape shut and drop in mail. (We pay postage.)

### To Order By Phone:

Just call with your   in hand, 8:00-5:30 (West Coast time), M-F, **(503) 244-5782**, to get your order in the works ASAP! We'll look forward to your call!
