(Note: Protection schemes change frequently. If you have a brand new version of a program you can't backup, please let us know so we can report it to our programmers. Thank you!)

Special instructions for products noted above with corresponding numbers:

- 1) To backup this diskette, see "TO INSTALL NOKEY AND RUN A NOKEY FLOPPY BACKUP" under "MAKING FLOPPY BACKUPS."
- 2) These diskettes are "flippy" diskettes. To back them up, backup the front side onto one blank diskette using the /1 parameter and backup the reverse side onto another blank diskette, also using /1.
- 3) You'll need to backup these diskettes AFTER performing the install procedure on the original.
- 4) Can be run from the hard disk without inserting the original floppy. See "RUNNING PROTECTED PROGRAMS FROM A HARD DISK WITH NOKEY."
- 5) Requires the /1 parameter.
- 6) May require running "NOGUARD" (on Copy II PC disk) before running backup. (See your Copy II PC manual.)
- 7) To run from a hard disk, install COPY II PC-made floppy backup using manufacturer's instructions. (Original must have install available for backup to be installable.)

Central Point Software

INCORPORATED

9700 S.W. Capitol Hwy. #100
Portland, OR 97219
(503) 244-5782
Tlx 757710

Dear Central Point Software Customer,

Thank you for your purchase. Like you, we recognize the importance of making backups of software so you will find that this product is not "copy protected" in any way.

In case you are not yet familiar with the copyright law as it relates to making copies of computer software, we'd like to take this opportunity to discuss it with you.

Many manufacturers of computer software copy-protect their products to physically prevent people from making copies and giving them away or reselling them. **Under the copyright law, you have a right to make copies to use in the event your original disk no longer functions. It is important to note that this is the only right to copy afforded to you under the law,** and both we and other software publishers request that you do not make copies for any other purpose.

Some states have enacted or are considering enacting "Shrink Wrap" license enforcement acts which may or may not affect your right to make backups of certain software products. We suggest that you check your state law to see whether it applies to you in this regard.

As part of an industry-wide effort to inform people of their rights under the U.S. copyright law, we have enclosed a copy of ADAPSO's "Thou Shalt Not Dupe" flyer. We hope you will take a moment to read it before using our product.

THANK YOU again for your purchase! We know you will find using your computer much more pleasant knowing you have safely put away backups of your valuable software.

Sincerely,

Michael D. Brown
President

NEED TECHNICAL SUPPORT?

Being a registered owner of Copy II PC entitles you to customer support, so please do be sure to register.

1. First jot down the serial number as noted on your registration card here: _____.
2. Drop your registration card in the mail. (If you bought directly from us you won't receive a registration card as we registered you automatically.)
3. After your registration card is entered into our database you will be assigned a permanent customer number, which we'll tell you when you call _____.
(If you bought directly from us, your customer # is on your invoice, just above your name.)

We have tried to make our instructions clear and easy-to-follow, but if you need help, don't hesitate to call!

You may be able to save yourself a call. Did you remember to...

- 1) If you're having trouble, start from a cold boot and use your original un-modified DOS. (It really does make a difference in some cases.)
- 2) Check the back-up-able list for any specific instructions that may be required.

If those things don't do the trick, call. We'll be glad to help - 503/244-5782.

Please help us help you! Having the following information at your fingertips allows us to do so most efficiently:

1. Your customer number or serial number.
2. The Central Point product with which you need support.
3. Your computer's brand name and model _____
4. Memory size _____ Operating system name and version number _____
5. Brand and size of hard disk (if applicable) _____
6. Name of program you're trying to backup _____ version # _____
7. Are you trying to make a floppy backup or run it from a hard disk?
8. Are you getting any error messages?

What It Means to You

It's obvious that legitimate software users are paying for theft along with software developers.

It's obvious, too, that no one is going to put up with it for long.

Think twice before you ask someone to give you an illegal copy of their software. Think three times before you offer to do it for someone else. *Softlifting* or *software piracy* is not only a crime; it's simply wrong.

Where to Get More Information

ADAPSO represents more than 750 corporate members that provide a wide spectrum of computer services and software including: micro, mini and mainframe software products; professional software services; batch and remote processing services; integrated hardware/software systems; education and training; and consulting.

For further information or questions on software protection, contact ADAPSO at Suite 300, 1300 North 17th Street, Arlington, VA 22209; or phone (703) 522-5055.

We encourage you to reproduce and distribute copies of this brochure.

Thou Shalt Not Dupe

Either Way It's Wrong

People who would never walk into a store and shoplift a software product think nothing of making several copies of the same software. The results are the same. The act is just as wrong.

When it comes to unauthorized duplication of software, many people do not realize the costly impact on the software developer and the customer community. The relationship between customer and developer in a software transaction is one of mutual trust. The customer trusts that the developer has produced a product that will deliver the desired result, performs according to specifications, and is properly documented and supported. **The developer trusts that the customer will make use of only those copies for which he has purchased a license, even though making additional, unauthorized copies**

Unauthorized duplication and use of software violates the U.S. Copyright Law, and unfairly deprives software developers of revenue they are entitled to receive for their work.

Software developers find that thousands of illegal copies have been made by customers who either innocently believe they are doing nothing wrong or simply choose to ignore the law.

The Law is Clear

Reproducing computer software without authorization violates the U.S. Copyright Law. It is a Federal offense. The money paid for a software product represents a license fee for the use of one copy. It does not represent an authorization to copy. Civil damages for unauthorized software copying can be as much as \$50,000 or more and criminal penalties include fines and imprisonment. Bills have been introduced in Congress to strengthen the law and increase penalties.

Myths and Facts of Software

Let's start by dispelling some myths with a few facts.

First, software developers *do not* condone unauthorized copying in order to gain market penetration.

Second, the price of software *does not* make unauthorized copying justifiable. The cost of a software product to a consumer represents only a small fraction of the publisher's development and marketing costs.

Third, although the cost of *softlifting* is borne initially by the software developer, it is paid for ultimately by legitimate users.

REGISTRATION CARD
